Maths

This week, we are continuing to focus on Multiplication and Division. https://whiterosemaths.com/homelearning/

Before you start division, make sure you have practised:
>   Using arrays to multiply by 10
>   Using arrays to multiply by 5
>   Using arrays to multiply by 2

Can you also practise using multiplication to solve worded problems? You can find these on the website too!

Key vocabulary: multiplication, times, lots of, groups of, altogether, array, equal.

When beginning to use division, remember that to divide just means to share! 6÷2 means 6 shared between 2.

Practise dividing by using circles. If I was working out 6÷2 I would draw 2 circles and count putting dots into each circle, alternating as I go and counting to 6. I should end up with 3 dots in each circle. I now know that 6÷2=3. Have a go at dividing by 10, 5 and 2!

Key vocabulary: division, divide, share, array, equal, equally, alternate.
